System & **Analysis:** BPMN, DFDs, ERD, Data Analysis, Usability Testing, User Interviews

Platforms & **Tools:** Lucidchart, Google Analytics, Microsoft Office Suite, Adobe Creative Suite, Canva

Experience

Fantuan Delivery | Market & Growth Assistant ***Sept 2024 – Present***
Field Marketing & User Acquisition *Toronto, ON*

- Executed targeted ground promotion campaigns across high-traffic transit hubs and university campuses, driving grassroots brand awareness and facilitating on-the-spot user acquisition.
- Conducted 1:1 live app demonstrations and guided new users through the registration process, successfully engaging and recording over 100 verified sign-ups during peak single-day shifts.
- Tracked daily promotional metrics, including flyer distribution volume, physical foot traffic, and direct outreach headcounts, providing regional management with actionable data to optimize future shift scheduling.

Baidu | Product Research Analyst ***May 2024 - Jun 2024***
Baidu Translate ("Product Experience Officer" Program) *Remote*

- Executed task-based usability testing on 5+ AI-driven product features (e.g., AI big model translation) to evaluate user workflows.
- Identified and documented 3 major system friction points related to workflow efficiency, synthesizing findings into a structured report with actionable product recommendations.
- Recognized as a "Top Product Experience Officer" (awarded to the Top 5% of participants) for analytical rigor and attention to detail.

Independent | Digital Media Operations Specialist ***March 2024 – Present***
Gaming Content Strategy & Cross-Platform Operations *Remote*

- Directed content strategy and produced gaming video content across major short-video platforms (Douyin, RedNote, WeChat Channel), accumulating over 30 million impressions and 20,000+ cross-platform followers.
- Analyzed native platform metrics (e.g., viewer retention, click-through rates) to continuously optimize content format, generating over 3.12 million total engagements (likes and saves).

Projects

UofTips | Course Information Web Platform ***July 2025***
(BMS316 Course Project) *github.io/UofTips*

- Designed and developed a functional web platform using HTML, CSS, and JavaScript to resolve critical student pain points related to academic course planning.
- Synthesized qualitative data from 200+ online community threads and 30+ student interviews to gather user requirements and define key Information Architecture.
- Launched a user-friendly interface that exceeded academic expectations, receiving positive feedback from the professor for usability and problem-solving.
